

8124A SERIES™, 8123A SERIES™, 8127A SERIES™

CAST IRON, STEEL EXTERNALS & STAINLESS STEEL | UNIVERSAL PRODUCT LINE

FEATURES & BENEFITS

- Sealless mag drive eliminates the shaft seal to provide the highest level of liquid and vapor containment
- All liquid and vapor is hermetically sealed in the pump
- Used especially for hazardous and difficult-to-seal liquids

The inner magnet is the driven magnet, aligned by magnetic force passing through the canister; the inner magnet assembly is shielded in a laser welded 316SS housing to prevent exposure of the magnets to the liquid

The outer magnet is the drive magnet, driven directly by the motor

Canister & Bushing Assembly

Stepped housing keeps the outer magnet from contacting the canister in the unlikely event of bearing failure

Multiple port sizes, types and ratings are available including threaded and flanged

Thrust Washers

Adjustable Internal relief valve standard, optional return-to-tank and jacketed available

Rotor Idler

Rotatable pump casing in 90° increments, permitting four different port positions. Opposite ports casings also available

One-piece cast bracket provides rigid foundation that is dimensionally interchangeable with Universal Product Line pumps
